

Mercury-Free (Hg-Free) Certification

July 23, 2013

Dear Customer,

Pursuant to your request for mercury-free (Hg-Free) certification of Amphenol Industrial & Aerospace Operations (AIAO) interconnect products, we hereby offer the following position.

Per review of the materials & processes utilized in the manufacture of our products, Amphenol Industrial & Aerospace Operations hereby acknowledges its products DO NOT contain, at the homogenous material level, intentionally added mercury (Hg) or mercury compounds in excess of 1000 ppm or 0.1% w/w.

Product conformity assessments are based on Amphenol specific data and Material Declarations received from our suppliers. It is not our standard practice to perform confirmatory or tramp analysis on supplied materials, nor assume liability beyond supplied product cost, for any errors or omissions attributed to our supplier base.

AIAO will respond to specific questions regarding the chemical constituents in their interconnect products to the extent that such response does not require the disclosure of proprietary or confidential information.

Should you have any further questions, please contact me at your convenience.

Sincerely,

John Bianchi
Product Compliance Engineer
Amphenol Aerospace
